

(Continued from back cover)

MICHAEL TH. RASSIAS: <i>From a cotangent sum to a generalized totient function</i>	369–385
HORST ALZER AND JUNESANG CHOI: <i>The Riemann zeta function and classes of infinite series</i>	386–398
S. H. SAKER, A. A. EL-DEEB, H. M. REZK AND R. P. AGARWAL: <i>Hilbert’s Inequality on Time Scales</i>	399–423
MARINESCU DAN ȘTEFAN, MONEA MIHAI, MORTICI CRISTINEL: <i>Some characterizations of inner product spaces via some geometrical inequalities</i>	424–433
TIBOR K. POGÁNY, GAUSS M. CORDEIRO, MUHAMMAD H. TAHIR, HARI M. SRIVASTAVA: <i>Generalized integro-exponential function and Chen distribution</i>	434–450
ALEKSANDAR PEJČEV: <i>Error estimates of Gaussian quadratures with the third Bernstein-Szegő weights</i>	451–469
ALVISE SOMMARIVA AND MARCO VIANELLO: <i>Subperiodic trigonometric subsampling: a numerical approach</i>	470–483

Prepress and layout: Bojan Banjac, Branko Malešević

Publisher: University of Belgrade, Faculty of Electrical Engineering

Printed: October 2017.

CONTENTS

SAKANDER HAYAT, MUHAMMAD JAVAID, JACK H. KOOLEN: <i>Graphs with two main and two plain eigenvalues</i>	244–257
DOMINGOS M. CARDOSO, PAULA CARVALHO, PAULA RAMA, SLOBODAN K. SIMIĆ, ZORAN STANIĆ: <i>Lexicographic polynomials of graphs and their spectra</i>	258–272
RODRIGO O. BRAGA, VIRGÍNIA M. RODRIGUES, VILMAR TREVISAN: <i>Locating eigenvalues of unicyclic graphs</i>	273–298
ZORAN RADOSAVLJEVIĆ: <i>Dragoš M. Cvetković - A brilliant scientific career that is going on</i>	299–303
KINKAR CH. DAS, SELVARAJ BALACHANDRAN, IVAN GUTMAN: <i>Inverse degree, Randić index and harmonic index of graphs</i>	304–313
CLEMENS HEUBERGER AND HELMUT PRODINGER: <i>Protection Number in Plane Trees</i>	314–326
PIERPAOLO NATALINI AND PAOLO EMILIO RICCI: <i>Higher order Bell polynomials and the relevant integer sequences</i>	327–339
SZYMON DUDEK: <i>Fixed point theorems in Fréchet algebras and Fréchet spaces and applications</i>	340–357
RICARDO ALMEIDA: <i>What is the best fractional derivative to fit data?</i>	358–368
