

(Continued from back cover)

SANDI KLAVŽAR AND SARA SABRINA ZEMLJIĆ: <i>Connectivity and some other properties of generalized Sierpiński graphs</i>	401–412
TOUFIK MANSOUR AND MARK SHATTUCK: <i>Counting water cells in bargraphs of compositions and set partitions</i>	413–438
S.H. MAŠOVIĆ, I.A. ELSHAARAWY, P.S. STANIMIROVIĆ AND P.V. KRTOLICA: <i>Orbiting Triangle Method for Convex Polygon Triangulation</i>	439–454
ELIZANDRO MAX BORBA, ELISEU FRITSCHER, CARLOS HOPPEN AND SEBASTIAN RICHTER: <i>The p-spectral radius of the Laplacian matrix</i>	455–466
FENG QI, DONGKYU LIM AND BAI-NI GUO: <i>Some identities related to Eulerian polynomials and involving the Stirling numbers</i>	467–480
M. MURSALEEN AND SYED M.H. RIZVI: <i>Existence results for second order linear differential equations in Banach spaces</i>	481–492
CHAO-PING CHEN: <i>Asymptotic expansions for certain mathematical constants and special functions</i>	493–507
ANTANAS LAURINČIKAS AND RENATA MACAITIEN: <i>Joint approximation of analytic functions by shifts of the Riemann and Periodic Hurwitz Zeta-functions</i>	508–527

Prepress and layout: Bojan Banjac, Branko Malešević

Publisher: University of Belgrade, Faculty of Electrical Engineering

Printed: October 2018.

CONTENTS

MICHAEL TH. RASSIAS, BICHENG YANG AND ANDREI RAIGORODSKII: <i>Two kinds of the Reverse Hardy-Type Integral Inequalities with the equivalent forms related to the extended Riemann Zeta Function</i>	273–296
ENCARNACIÓN ABAJO, ROCÍO CASABLANCA, ANA DIÁNEZ AND PEDRO GARCÍA-VÁZQUEZ: <i>On generalized 3-connectivity of the strong product of graphs</i>	297–317
M. R. JABBARZADEH, H. EMAMALIPOUR AND M. SOHRABI CHEGENI: <i>Moore-Penrose inverse and Aluthge transformation of operators</i>	318–335
HAMID MAMGHADERI AND HASHEM PARVANEH MASIHA: <i>Fixed point theorem in ultrametric space</i>	336–346
EWA SCHMEIDEL AND ARUN KUMAR TRIPATHY: <i>Oscillation criteria for three dimensional linear difference systems</i>	347–361
EMANUELE MUNARINI: <i>Combinatorial identities for Appell polynomials</i>	362–388
ISHAK ALTUN AND BESSEM SAMET: <i>Pseudo Picard Operators on Generalized Metric Spaces</i>	389–400
