FOR AUTHORS

Complete and updated instructions for authors can be found at the Web site <http://pefmath.etf.rs>

Scope: Applicable Analysis and Discrete Mathematics publishes original papers in Mathematics, particularly in classical mathematical analysis, complex analysis, functional analysis, differential and difference equations, special functions, combinatorics and graph theory, mathematical applications in probability and statistics, numerical analysis and computer science. Submissions dealing with applications of mathematical models in other sciences or in real-world problems, are welcome provided that they focus on mathematics rather than on application itself.

How to prepare articles: Articles should be written in English language. The style of writing must meet usual standards for mathematical papers. Papers written in a careless manner will not be accepted, independently of their mathematical contents.

Authors are requested to use L^AT_EX or any other version of T_EX in preparation of their articles, preferably in a L^AT_EX template that can be downloaded from the Web site, together with specific style guidelines.

How to submit: Submissions should be made online, from the Web site. Only pdf files can be uploaded.

Additional information can be found at the Web site.
